# THE LIES IN THE SKIES EXPOSED

WATCH NOW

## **“HE WHO CONTROLS THE WEATHER, CONTROLS THE WORLD.”**

FrankenSkies is an 80-minute social change documentary regarding the Solar Geoengineering/Chemtrail agenda that affects every living being on earth. The struggle of bringing awareness to this subject, despite the obstacles of a socially engineered populace and the military industrial complex with its endless resources, is palpable in this awakening truth feature.

An impeccably timed eye-opening exposé, the film reveals the campaign to normalize chemical cloud formations via atmospheric aerosol dispersals.

Up against a normalization timetable encompassing a controlled media and an indoctrinated educational and political system, activists ask the question:

### **Is your silence your consent?**

A shocking informative film on climate engineering, frequency control and CIA manipulation, the film's narrative unfolds through a historical timeline of experimentation on humanity, bringing us to a modern-day laboratory that encompasses the air we breathe and dictates when and where the sun shall shine, or not...

## FEATURED ARTICLES

### **IS FLUORIDE SAFE TO CONSUME?**

The use of fluoride in toothpaste and drinking water has been debated for years. Some advocates claim that it is harmless, while others insist that there are health benefits. When it comes to the science of the matter, however, the facts are not in fluoride's corner. It presents a laundry list of potential harmful side effects. Before we get into those, let us...

### **TEEN DEPRESSION & TECHNOLOGY**

With the cases of teen depression rising every year, we must take a step back and reflect on what societal changes might be contributing to this mental health disorder surge. One area of our lives which has increased dramatically over the past two decades is

the use of technology. In particular, social media platforms with their prevalence and commonality in everyday living, have...

## **THE HIDDEN DANGERS OF WEARABLE TECHNOLOGY**

Technology is slowly becoming more and more prominent in all aspects of our life, and while there are numerous benefits offered by technology, there are also risks that need to be considered. One area which has been increasing in popularity, primarily due to a worldwide goal of reaching "10,000 steps" a day, is wearable technology—specifically smartwatches such as Fitbit and Apple Watches. What...

## **EMF RADIATION IN BABIES: TECHNOLOGY'S HIDDEN DANGERS**

As parents, you want nothing but the best for your baby. Many times, this innate desire to control as much as we can for our children leads us to buy the latest and greatest technology on the market. However, some of this technology actually has an adverse effect on your baby, putting them at risk of EMF radiation. What is EMF Radiation? Electromagnetic...

# **ABOUT THE FILMMAKER**

## **MATT LANDMAN**

**FIRST THE TRUTH WILL UPSET YOU,  
BUT THEN IT WILL SET YOU FREE.**

I never thought I would be an activist but I  
guess that's life, one door closes another  
door opens. For me I'd worked so many  
different jobs and spent so much of my life in

a classroom that I just wanted to get grounded and learn about growing food. I worked on a farm and there I opened my eyes for the first time to the FrankenSkies we never knew. From the day I realized something abnormal was occurring in our skies, I was driven to do something about it. Through my devotion and passion, I've realized incredible traction via social media. My goal is very simple, it is unity. Truth is all embracing and our strength comes from this bond we all share.
